A PRODUCT OF KALASH CONTAINERS (INDIA) PVT.LTD

KALASH HAI JAHA
SHUBH LABH HAI WAHA

AN ISO 9001-2015 CERTIFIED COMPANY

KALASH CONTAINERS (INDIA) PVT. LTD.

WATER STORAGE SOLUTIONS

We are renowned as the distinguished manufacturer and supplier of superior quality Barriers, Storage Tanks, Entry Pallets, Traffic Cones, etc.

www.kalashcontainers.com

ABOUT THE COMPANY

-Kalash Containers (India) Pvt.Ltd is an iso 9001-2015 certified company that was established in 2008.

- We have been able to get business from different corners of india by delivering a range of superior quality products.

- Our manufacturing plant is equipped with the latest technology and machinery that enables us to produce and deliver high quality products on time and accomplish maximum satisfactory result.

- Every product of kalash comprises a unique design and high durability which is the manifestation of high workmanship standards latest technology and thoughtful engineering

-No wonder "KALASH" today is synonymous with quality and performance for millions across india

-With more than decade of experience in this industry, our organization has been able to target valuable customers.

-Innovation in product development (material, properties and design) is the key to our efforts to offer the best products available in the market and to maintain safety and comfort to the highest level.

-As a market leader with years of experience, "KALASH" is equipped to meet the demanding needs of the fast growing india and ensure that the growth is maintained along with a competitive edge.

ABOUT THE TEAM WORK IN OUR ORGANIZATION

Our organization is backed by a team of skilled and dedicated artisans and craftsmen who are committed to produce Plastic water storage tanks & Road safety Products corresponding to the specific needs of our clients. Their immense passion and tremendous efforts enable us to produce and deliver a range of quality products known for their exquisite designs and durability. We provide regular training session to our team members so as to equip them with the latest knowhow in the industry. Our professional's experience enables smooth operations at each stage and in each section viz quality, packaging and delivery.

KALASH WATER TANK FEATURES

Keeps water fresh & cool

Outer layer with heat resistant coating and non-fading color helps to reduce temperature of water from outside heat (sun)

Sunshield technology

5 layer tank with UV-resistant layer & middle black layers which prevents degradation and ensures that there is no cracking or losing of physical properties. 5 layer prevents outside heat, thereby helping to keep the water cool and fresh.

Heat reflective technology

Our proprietary heat reflective technology on the outer layer ensures that the water in the tank remains cool as highly reflective finish of the outer layer reflects most of the sunray back into the atmosphere. This gives our tanks long life and also safeguards the polymer's structure.

Rock strong body

Bolder ripe thick wall makes the tank super ultra-strong, ensures structurally sturdy for high volume capacity.

Unbreakable & durable body

Rounded edge to avoid stress formation and make it unbreakable.

Food grade inner layer

Special anti-bacterial food grade inner layer that resists existence & growth of bacteria and fungus and prevents the bad odor of water by prohibiting its contamination.

Supreme air-tight threaded lid

Airtight screwable lid keeps water fresh, keeps dirt and flies out and does not blow in windy days.

Plumber-friendly

Multi outlet options along with inlet and overflow configurations help plumbing easy connection and proper utilization of space.

KALASH ROTATIONAL MOULDING WATER TANK

Our clients can avail from us a range of premium quality Roto-Moulding Plastic Water Storage Tanks at reasonable prices.

CAPACITY LITRES	OVERALL HEIGHT		OVERALL DIAMETER		MANHOLE DIAMETER	
	inch	(mm)	inch	(mm)	inch	(mm)

2000	69	1752	54	1371	17.7	450

Specifications :

Made from high density polyethylene (HDPE) (100% virgin)

Available in UV stabilized with the facility of threaded lids which can be screwed onto the top to keep the dust-out.

Available in sizes from 300 Ltr to 2000 Ltr, Food grade material.

5 LAYER PROTECTION

Layer 1

-White (Heat Reflector)

Layer 2

-Black (UV Protection)

Layer 3

-Green (High Strength)

Layer 4

-Black (UV Protection)

Layer 5

-White (Food Grade)

Features:

Brighter

Stronger

100% Virgin Plastic

HDPE Material

Food Grade Material

Five-layer body

UV stabilized

Rustproof

Bacteria free

Protection against algae formation

Maintenance-free

Keeps water cool

Aesthetic design

Five-layer well-packed lid

Attractive packaging

KALASH ISI WATER TANK

Our clients can also avail from us an ISI Water Storage Tanks at reasonable prices.

CAPACITY LITRES	OVERALL HEIGHT		OVERALL DIAMETER		MANHOLE DIAMETER

5000	83	2108	75	1905	17.7	450

Specifications :

Made from linear low density polyethylene (LLDPE).

ISI certified water tank **CM/L:9100157108**

Available in black color with the facility of threaded lids which can be screwed on to the top to keep the dust out.

Available in double Layer, sizes from 300 Ltr to 5000 Ltr.

KALASH

ELECTROPLATING TANK

Electroplating tanks are typically made of materials such as high-density polyethylene (HDPE), polypropylene (PP), or fiberglass-reinforced plastic (FRP). These materials are chosen for their resistance to chemicals and corrosion, which are crucial in the electroplating environment.
